OBJECTIVE

QA Engineer skilled in ensuring software quality. Seeking to leverage expertise in testing methodologies and analytical skills to optimize product development processes and enhance user satisfaction within a collaborative team environment.

PROFESSIONAL SUMMARY

A highly skilled and results-oriented QA Automation Engineer with 4 years of experience in designing, developing, and implementing robust test automation frameworks. Proven ability to optimize quality assurance processes, reduce testing cycles, and enhance product stability by leveraging expertise in Selenium, Java, and Agile methodologies. A dedicated problem-solver and collaborative team player committed to delivering exceptional software quality.

SKILLS

Automation & Testing:	Selenium WebDriver, TestNG, BDD (Cucumber), Rest Assured, Postman
Programming:	Java
DevOps & Tools:	Jenkins CI-CD, Git
Methodologies:	Agile (Scrum), STLC, Defect Life Cycle, Test Strategy
Test & Defect Management:	JIRA
Soft Skills:	Attention to Detail, Problem-Solving, Team Collaboration, Mentorship

EXPERIENCE

Quality Engineer Analyst

[Aug 2024] – Present

Accenture

- Mentored and guided new team members on testing processes, automation best practices, and project tools, ensuring smooth on-boarding and effective contribution to the team.
- Designed and executed new integration test cases, preventing data inconsistencies in production and improving application reliability.
- Performed rigorous smoke and regression testing on every code drop, ensuring application stability before deployment.
- Collaborated with cross-functional teams to design comprehensive regional and pass-through scenarios, increasing overall test coverage.
- Enhanced the existing automation framework by developing reusable test classes, reducing maintenance effort and improving scalability.
- Independently designed a new test automation framework using Cucumber BDD, streamlining collaboration between QA and developers.

QA Automation Engineer

Jan 2022 – [July 2024]

Capgemini

- Automated critical regression test cases using Selenium with Java and TestNG, significantly reducing manual testing effort.
- Developed a reusable BDD framework using Cucumber, improving collaboration between QA, developers, and product owners.
- Integrated test suites with Jenkins CI/CD pipelines, enabling continuous testing and providing instant feedback on every commit.

- Led API testing for core features using Rest Assured and Postman, identifying and resolving critical bugs early in the development cycle.
- Actively participated in Agile ceremonies, providing accurate estimates and ensuring timely sprint deliveries.
- Utilized JIRA for defect management and reported detailed test coverage metrics to stakeholders on a regular basis.

ACHIEVEMENTS

- Received **Client Appreciation Award** for consistently delivering high-quality test automation solutions within tight deadlines.
- Recognized with **Spot Award** for identifying issues and preventing business impact.
- Acknowledged by client stakeholders for improving overall test coverage, ensuring smoother releases and higher customer satisfaction.

EDUCATION

Bachelor of Electrical Engineering, Pune University
CGPA: 8.56

2021

DECLARATION

I, hereby, solemnly declare that the above-mentioned information is true to the best of my knowledge.
